New 'Plot' Inquiry Reported On Kennedy Assassination

NEW ORLEANS, Feb. 1 (UPI) — The New Orleans States-Item said today that the District Attorney's office was investigating reports of a conspiracy in the assassination of President Kennedy that involved New Orleans residents.

The Orleans Parish (County) District Attorney's office confirmed that an inquiry was under way but called it routine. It appeared to be a second look into the activities of a New Orleans pilot who had been questioned shortly after the assassination.

The pilot is identified in the Warren Report as David Ferry, a former commercial airline flier who was detained here four days after President Kennedy's death in Dallas.

The States-Item said in a copyrighted story that the District Attorney's office had spent more than $8,000 on the investigation since Nov. 25, 1966.

In Dallas, District Attorney Henry Wade discounted any multiple-assassin or plot theory.
